## TABLE OF CONTENTS

PERIODIC TABLE CONVERSIONS AND CONSTANTS LIST OF ELEMENTS	INSIDE FRONT COVER LAST PAGE INSIDE BACK COVER
34. PHASES, Part 1	349
34.1 About phase    34.2 Options    34.3 A change of phase    34.4 Some number-crunching	
35. PHASES, Part 2	359
35.1 Vaporization/condensation    35.2 Balance    35.3 A wet and dry topic    35.4 It's not just about water.    35.5 Coming to a boil	
36. PHASES, Part 3	369
36.1 Sublimation/deposition    36.2 Fusion/freezing    36.3 Putting it together    36.4 A critical point	
37. INTERMOLECULAR FORCES	378
37.1 Three IFs    37.2 Dipole-dipole    37.3 Hydrogen bonding    37.4 Dispersion 37.5 Orientation effects    37.6 What IF?	
38. LIQUIDS AND SOLIDS	391
38.1 Liquids    38.2 Solids    38.3 Classification of solids by lattice    38.4 Classification of solids by chemical type	
39. MIXTURES, Part 1	401
39.1 Solutions    39.2 The enthalpy part    39.3 Two more IFs    39.4 A quantitative look at $\Delta H_{\text{soln}}^{\circ}$ 39.5 Not the whole story	
40. MIXTURES, Part 2	413
40.1 The entropy part    40.2 Solubility and miscibility    40.3 A world of consequences 40.4 Balance in perspective	
41. SOLUTION EQUILIBRIA	425
41.1 Solubility and equilibrium    41.2 Solution equilibria for gas-phase solutes 41.3 Solution equilibria for liquid-phase and solid-phase solutes	
42. CONCENTRATIONS	433
42.1 Molality    42.2 Percents    42.3 pp terms    42.4 Concentration conversions	
43. COLLIGATIVES	442
43.1 Preliminaries    43.2 Vapor pressure lowering and boiling point elevation 43.3 Freezing point depression    43.4 Osmotic pressure    43.5 The journey never really ends.	
44. CAN IT HAPPEN? Part 1	452
44.1 Entropy, qualitatively    44.2 Entropy, quantitatively    44.3 Entropy, arithmetically	
45. CAN IT HAPPEN? Part 2	461
45.1 Spontaneous    45.2 A universe of options    45.3 The law    45.4 Free energy, qualitatively    45.5 Free energy, quantitatively	
46. CAN IT HAPPEN? Part 3	473
46.1 Stoichiometry    46.2 Temperature effects    46.3 Standard conditions 46.4 General conditions    46.5 Getting into Q    46.6 Keeping the perspective	

47. FREE ENERGY AND EQUILIBRIUM	484
47.1 <i>Equilibrium aspects</i> 47.2 <i>Drive</i>	
48. WILL IT HAPPEN? Part 1	491
48.1 <i>Kinetics</i> 48.2 <i>Two Examples</i> 48.3 <i>It's elementary.</i> 48.4 <i>Speed relationships</i>	
49. WILL IT HAPPEN? Part 2	501
49.1 <i>At any rate</i> 49.2 <i>An integrated approach</i> 49.3 <i>Two halves do not make a whole.</i> 49.4 <i>k and T</i>	
50. DOES IT HAPPEN?	516
50.1 <i>Getting into reverse</i> 50.2 <i>In the R.E.D.</i> 50.3 <i>Catalyst for change</i> 50.4 <i>Some perspective</i> 50.5 <i>Another path completed</i>	
51. GENERAL EQUILIBRIUM	528
51.1 <i>More Q and K</i> 51.2 <i>More <math>\Delta G^\circ</math> and K</i> 51.3 <i>Three relationships for K and Q</i> 51.4 <i>General examples</i>	
52. EQUILIBRIUM CHANGE	539
52.1 <i>Problems of change</i> 52.2 <i>Approximation</i> 52.3 <i>General steps for change</i>	
53. EQUILIBRIUM DYNAMICS	551
53.1 <i>Three Principles</i> 53.2 <i>Applications</i>	
54. ACID-BASE EQUILIBRIA, Part 1	560
54.1 <i>Refresh</i> 54.2 <i>Autoionization</i> 54.3 <i>p</i> 54.4 <i>Give/take and conjugate</i>	
55. ACID-BASE EQUILIBRIA, Part 2	573
55.1 $K_a$ 55.2 <i>Iterate, iterate, iterate</i> 55.3 <i>Mono vs. poly</i> 55.4 <i>Strong, weak and weaker</i>	
56. ACID-BASE EQUILIBRIA, Part 3	589
56.1 <i>Back to basics</i> 56.2 <i>Weak conjugates</i> 56.3 <i>Acid-base effects of salts</i> 56.4 <i>Acid effects of metal cations</i>	
57. BUFFERS	604
57.1 <i>Buffer fundamentals</i> 57.2 <i>Capacity</i> 57.3 <i>Further examples</i>	
58. ACID-BASE TITRATIONS	614
58.1 <i>More background</i> 58.2 <i>SA-SB</i> 58.3 <i>WA-SB</i> 58.4 <i>Summary</i>	
59. IONIC SOLUBILITY EQUILIBRIA	629
59.1 <i>Solubility</i> 59.2 $K_{sp}$ 59.3 <i>Other equilibria in ionic solutions</i> 59.4 <i>Eye on ions</i>	
60. MORE IONIC SOLUTION EQUILIBRIA	640
60.1 <i>More of solubility</i> 60.2 <i>Complex formation</i> 60.3 <i>More complex equilibria</i> 60.4 <i>Close</i>	
61. ECHEM, Part 1	654
61.1 <i>Some preliminaries</i> 61.2 <i>Half-reaction method</i>	
62. ECHEM, Part 2	662
62.1 <i>Cell anatomy</i> 62.2 <i>Terminals, terminology and notation</i> 62.3 <i>Current topics</i>	
63. ECHEM, Part 3	676
63.1 <i>Two halves make a whole.</i> 63.2 <i>Two halves make another half.</i>	
64. ECHEM, Part 4	686
64.1 <i>Back in Q</i> 64.2 <i>Drive</i> 64.3 <i>Batteries and fuel cells</i>	

65. ECHEM, Part 5	700
65.1 <i>More electrolytic</i>	
65.2 <i>Stoichiometry and other current aspects</i>	
65.3 <i>Corrosion</i>	
65.4 <i>Another closing</i>	
66. NUCLEAR CHEMISTRY, Part 1	711
66.1 <i>Some preliminaries</i>	
66.2 <i>Elements of decay</i>	
66.3 <i>Generations of daughters</i>	
66.4 <i>Nuclear structure and (in)stability</i>	
67. NUCLEAR CHEMISTRY, Part 2	724
67.1 <i>Activity</i>	
67.2 <i>Human activity</i>	
67.3 <i>Integration of disintegration</i>	
68. NUCLEAR CHEMISTRY, Part 3	735
68.1 <i>Mass-energy</i>	
68.2 <i>Mass-energy of decay</i>	
68.3 <i>Aftermath</i>	
Appendix A: THERMOCHEMICAL TABLES	A-1
Appendix B: AQUEOUS EQUILIBRIUM CONSTANTS	B-1
Appendix C: HALF-CELL POTENTIALS	C-1
Appendix D: ANSWERS TO END-OF-CHAPTER PROBLEMS	D-1
