

TABLE OF CONTENTS

PERIODIC TABLE	INSIDE FRONT COVER
CONVERSIONS AND CONSTANTS	LAST PAGE
LIST OF ELEMENTS	INSIDE BACK COVER
34. PHASES, Part 1	351
34.1 About phase	
34.2 Options	
34.3 A change of phase	
34.4 Some number-crunching	
35. PHASES, Part 2	361
35.1 Vaporization/condensation	
35.2 Balance	
35.3 A wet and dry topic	
35.4 It's not just about water.	
35.5 Coming to a boil	
36. PHASES, Part 3	372
36.1 Sublimation/deposition	
36.2 Fusion/freezing	
36.3 Putting it together	
36.4 A critical point	
37. INTERMOLECULAR FORCES	382
37.1 Three IFs	
37.2 Dipole-dipole	
37.3 Hydrogen bonding	
37.4 Dispersion	
37.5 Orientation effects	
37.6 What IF?	
38. LIQUIDS AND SOLIDS	395
38.1 Liquids	
38.2 Solids	
38.3 Classification of solids by lattice	
38.4 Classification of solids by chemical type	
39. MIXTURES, Part 1	405
39.1 Solutions	
39.2 The enthalpy part	
39.3 Two more IFs	
39.4 A quantitative look at $\Delta H_{\text{soln}}^{\circ}$	
39.5 Not the whole story	
40. MIXTURES, Part 2	418
40.1 The entropy part	
40.2 Solubility and miscibility	
40.3 Summary	
40.4 A world of consequences	
40.5 Balance in perspective	
41. SOLUTION EQUILIBRIA	431
41.1 Solubility and equilibrium	
41.2 Solution equilibria for gas-phase solutes	
41.3 Solution equilibria for liquid-phase and solid-phase solutes	
42. CONCENTRATIONS	439
42.1 Molality	
42.2 Percents	
42.3 pp terms	
42.4 Concentration conversions	
43. COLLIGATIVES	448
43.1 Preliminaries	
43.2 Vapor pressure lowering and boiling point elevation	
43.3 Freezing point depression	
43.4 Osmotic pressure	
43.5 The journey never really ends.	
44. CAN IT HAPPEN? Part 1	456
44.1 Entropy, qualitatively	
44.2 Entropy, quantitatively	
44.3 Entropy, arithmetically	
45. CAN IT HAPPEN? Part 2	465
45.1 Spontaneous	
45.2 A universe of options	
45.3 The law	
45.4 Free energy, qualitatively	
45.5 Free energy, quantitatively	
46. CAN IT HAPPEN? Part 3	477
46.1 Stoichiometry	
46.2 Temperature effects	
46.3 Standard conditions	
46.4 General conditions	
46.5 Getting into Q	
46.6 Keeping the perspective	

47. FREE ENERGY AND EQUILIBRIUM	488
47.1 <i>Equilibrium aspects</i> 47.2 <i>Drive</i>	
48. WILL IT HAPPEN? Part 1	496
48.1 <i>Kinetics</i> 48.2 <i>Two Examples</i> 48.3 <i>It's elementary.</i> 48.4 <i>Speed relationships</i>	
49. WILL IT HAPPEN? Part 2	506
49.1 <i>At any rate</i> 49.2 <i>An integrated approach</i> 49.3 <i>Two halves do not make a whole.</i> 49.4 <i>k and T</i>	
50. DOES IT HAPPEN?	521
50.1 <i>Getting into reverse</i> 50.2 <i>In the R.E.D.</i> 50.3 <i>Catalyst for change</i> 50.4 <i>Some perspective</i> 50.5 <i>Another path completed</i>	
51. GENERAL EQUILIBRIUM	533
51.1 <i>More Q and K</i> 51.2 <i>More ΔG° and K</i> 51.3 <i>Three relationships for K and Q</i> 51.4 <i>General examples</i>	
52. EQUILIBRIUM CHANGE	544
52.1 <i>Problems of change</i> 52.2 <i>Approximation</i> 52.3 <i>General steps for change</i>	
53. EQUILIBRIUM DYNAMICS	555
53.1 <i>Three Principles of Equilibrium Dynamics</i> 53.2 <i>Applications</i>	
54. ACID-BASE EQUILIBRIA, Part 1	564
54.1 <i>Refresh</i> 54.2 <i>Autoionization</i> 54.3 <i>p</i> 54.4 <i>Give/take and conjugate</i>	
55. ACID-BASE EQUILIBRIA, Part 2	577
55.1 K_a 55.2 <i>Iterate, iterate, iterate.</i> 55.3 <i>Mono vs. poly</i> 55.4 <i>Strong, weak and weaker</i>	
56. ACID-BASE EQUILIBRIA, Part 3	593
56.1 <i>Back to basics</i> 56.2 <i>Weak conjugates</i> 56.3 <i>Acid-base effects of salts</i> 56.4 <i>Acid effects of metal cations</i>	
57. BUFFERS	608
57.1 <i>Buffer fundamentals</i> 57.2 <i>Capacity</i> 57.3 <i>Further examples</i>	
58. ACID-BASE TITRATIONS	618
58.1 <i>More background</i> 58.2 <i>SA-SB</i> 58.3 <i>WA-SB</i> 58.4 <i>Summary</i>	
59. IONIC SOLUBILITY EQUILIBRIA	633
59.1 <i>Solubility</i> 59.2 K_{sp} 59.3 <i>Other equilibria in ionic solutions</i> 59.4 <i>Eye on ions</i>	
60. MORE IONIC SOLUTION EQUILIBRIA	644
60.1 <i>More of solubility</i> 60.2 <i>Complex formation</i> 60.3 <i>Complex calculations</i> 60.4 <i>Close</i>	
61. ECHEM, Part 1	656
61.1 <i>Some preliminaries</i> 61.2 <i>Half-reaction method</i>	
62. ECHEM, Part 2	664
62.1 <i>Cell anatomy</i> 62.2 <i>Terminals, terminology and notation</i> 62.3 <i>Current topics</i>	
63. ECHEM, Part 3	678
63.1 <i>Two halves make a whole.</i> 63.2 <i>Two halves make another half.</i>	
64. ECHEM, Part 4	688
64.1 <i>Back in Q</i> 64.2 <i>Drive</i> 64.3 <i>Batteries and fuel cells</i>	

65. ECHEM, Part 5	702
<i>65.1 More electrolytic aspects</i>	
<i>65.2 Applications</i>	
<i>65.3 Stoichiometry and other current aspects</i>	
<i>65.4 Corrosion</i>	
<i>65.5 Another closing</i>	
66. NUCLEAR CHEMISTRY, Part 1	713
<i>66.1 Some preliminaries</i>	
<i>66.2 Elements of decay</i>	
<i>66.3 Generations of daughters</i>	
<i>66.4 Nuclear structure and (in)stability</i>	
67. NUCLEAR CHEMISTRY, Part 2	728
<i>67.1 Activity</i>	
<i>67.2 Human activity</i>	
<i>67.3 Integration of disintegration</i>	
68. NUCLEAR CHEMISTRY, Part 3	739
<i>68.1 Mass-energy</i>	
<i>68.2 Mass-energy of decay</i>	
<i>68.3 Aftermath</i>	
69. NUCLEAR CHEMISTRY, Part 4	748
<i>69.1 Mass defect and binding energy</i>	
<i>69.2 Nuclear reactions</i>	
<i>69.3 Fission</i>	
<i>69.4 Fusion</i>	
<i>69.5 Nucleosynthesis, or a very Big Bang and beyond</i>	
<i>69.6 Transuranium elements and the superheavies</i>	
Appendix A: THERMOCHEMICAL TABLES	A-1
Appendix B: AQUEOUS EQUILIBRIUM CONSTANTS	B-1
Appendix C: HALF-CELL POTENTIALS	C-1
Appendix D: ANSWERS TO END-OF-CHAPTER PROBLEMS	D-1
