TABLE OF CONTENTS

PERIODIC TABLE	INSIDE FRONT COVER
CONVERSIONS AND CONSTANTS	LAST PAGE
LIST OF ELEMENTS	INSIDE BACK COVER
34. PHASES, Part 1	351
<i>34.1 About phase 34.2 Options 34.3 A change of phase 34.4 Some number-crunching</i>	
35. PHASES, Part 2	361
<i>35.1 Vaporization/condensation 35.2 Balance 35.3 A wet and dry topic 35.4 It's not just about water. 35.5 Coming to a boil</i>	
36. PHASES, Part 3	372
<i>36.1 Sublimation/deposition 36.2 Fusion/freezing 36.3 Putting it together 36.4 A critical point</i>	
37. INTERMOLECULAR FORCES	382
<i>37.1 Three IFs 37.2 Dipole-dipole 37.3 Hydrogen bonding 37.4 Dispersion 37.5 Orientation effects 37.6 What IF?</i>	
38. LIQUIDS AND SOLIDS	395
<i>38.1 Liquids 38.2 Solids 38.3 Classification of solids by lattice 38.4 Classification of solids by chemical type</i>	
39. MIXTURES, Part 1	405
<i>39.1 Solutions 39.2 The enthalpy part 39.3 Two more IFs 39.4 A quantitative look at $\Delta H_{\text{soln}}^{\circ}$ 39.5 Not the whole story</i>	
40. MIXTURES, Part 2	418
<i>40.1 The entropy part 40.2 Solubility and miscibility 40.3 Summary 40.4 A world of consequences 40.5 Balance in perspective</i>	
41. SOLUTION EQUILIBRIA	431
<i>41.1 Solubility and equilibrium 41.2 Solution equilibria for gas-phase solutes 41.3 Solution equilibria for liquid-phase and solid-phase solutes</i>	
42. CONCENTRATIONS	439
<i>42.1 Molality 42.2 Percents 42.3 pp terms 42.4 Concentration conversions</i>	
43. COLLIGATIVES	448
<i>43.1 Preliminaries 43.2 Vapor pressure lowering and boiling point elevation 43.3 Freezing point depression 43.4 Osmotic pressure 43.5 The journey never really ends.</i>	
44. CAN IT HAPPEN? Part 1	456
<i>44.1 Entropy, qualitatively 44.2 Entropy, quantitatively 44.3 Entropy, arithmetically</i>	
45. CAN IT HAPPEN? Part 2	465
<i>45.1 Spontaneous 45.2 A universe of options 45.3 The law 45.4 Free energy, qualitatively 45.5 Free energy, quantitatively</i>	
46. CAN IT HAPPEN? Part 3	477
<i>46.1 Stoichiometry 46.2 Temperature effects 46.3 Standard conditions 46.4 General conditions 46.5 Getting into Q 46.6 Keeping the perspective</i>	

47. FREE ENERGY AND EQUILIBRIUM	488
47.1 <i>Equilibrium aspects</i> 47.2 <i>Drive</i>	
48. WILL IT HAPPEN? Part 1	496
48.1 <i>Kinetics</i> 48.2 <i>Two Examples</i> 48.3 <i>It's elementary.</i> 48.4 <i>Speed relationships</i>	
49. WILL IT HAPPEN? Part 2	506
49.1 <i>At any rate</i> 49.2 <i>An integrated approach</i> 49.3 <i>Two halves do not make a whole.</i> 49.4 <i>k and T</i>	
50. DOES IT HAPPEN?	521
50.1 <i>Getting into reverse</i> 50.2 <i>In the R.E.D.</i> 50.3 <i>Catalyst for change</i> 50.4 <i>Some perspective</i> 50.5 <i>Another path completed</i>	
51. GENERAL EQUILIBRIUM	533
51.1 <i>More Q and K</i> 51.2 <i>More ΔG° and K</i> 51.3 <i>Three relationships for K and Q</i> 51.4 <i>General examples</i>	
52. EQUILIBRIUM CHANGE	544
52.1 <i>Problems of change</i> 52.2 <i>Approximation</i> 52.3 <i>General steps for change</i>	
53. EQUILIBRIUM DYNAMICS	555
53.1 <i>Three Principles of Equilibrium Dynamics</i> 53.2 <i>Applications</i>	
54. ACID-BASE EQUILIBRIA, Part 1	564
54.1 <i>Refresh</i> 54.2 <i>Autoionization</i> 54.3 <i>p</i> 54.4 <i>Give/take and conjugate</i>	
55. ACID-BASE EQUILIBRIA, Part 2	577
55.1 K_a 55.2 <i>Iterate, iterate, iterate.</i> 55.3 <i>Mono vs. poly</i> 55.4 <i>Strong, weak and weaker</i>	
56. ACID-BASE EQUILIBRIA, Part 3	593
56.1 <i>Back to basics</i> 56.2 <i>Weak conjugates</i> 56.3 <i>Acid-base effects of salts</i> 56.4 <i>Acid effects of metal cations</i>	
57. BUFFERS	608
57.1 <i>Buffer fundamentals</i> 57.2 <i>Capacity</i> 57.3 <i>Further examples</i>	
58. ACID-BASE TITRATIONS	618
58.1 <i>More background</i> 58.2 <i>SA-SB</i> 58.3 <i>WA-SB</i> 58.4 <i>Summary</i>	
59. IONIC SOLUBILITY EQUILIBRIA	633
59.1 <i>Solubility</i> 59.2 K_{sp} 59.3 <i>Other equilibria in ionic solutions</i> 59.4 <i>Eye on ions</i>	
60. MORE IONIC SOLUTION EQUILIBRIA	644
60.1 <i>More of solubility</i> 60.2 <i>Complex formation</i> 60.3 <i>Complex calculations</i> 60.4 <i>Close</i>	
61. ECHEM, Part 1	656
61.1 <i>Some preliminaries</i> 61.2 <i>Half-reaction method</i>	
62. ECHEM, Part 2	664
62.1 <i>Cell anatomy</i> 62.2 <i>Terminals, terminology and notation</i> 62.3 <i>Current topics</i>	
63. ECHEM, Part 3	678
63.1 <i>Two halves make a whole.</i> 63.2 <i>Two halves make another half.</i>	
64. ECHEM, Part 4	688
64.1 <i>Back in Q</i> 64.2 <i>Drive</i> 64.3 <i>Batteries and fuel cells</i>	

65. ECHEM, Part 5	702
65.1 <i>More electrolytic aspects</i>	
65.2 <i>Applications</i>	
65.3 <i>Stoichiometry and other current aspects</i>	
65.4 <i>Corrosion</i>	
65.5 <i>Another closing</i>	
66. NUCLEAR CHEMISTRY, Part 1	713
66.1 <i>Some preliminaries</i>	
66.2 <i>Elements of decay</i>	
66.3 <i>Generations of daughters</i>	
66.4 <i>Nuclear structure and (in)stability</i>	
67. NUCLEAR CHEMISTRY, Part 2	728
67.1 <i>Activity</i>	
67.2 <i>Human activity</i>	
67.3 <i>Integration of disintegration</i>	
68. NUCLEAR CHEMISTRY, Part 3	739
68.1 <i>Mass-energy</i>	
68.2 <i>Mass-energy of decay</i>	
68.3 <i>Aftermath</i>	
69. NUCLEAR CHEMISTRY, Part 4	748
69.1 <i>Mass defect and binding energy</i>	
69.2 <i>Nuclear reactions</i>	
69.3 <i>Fission</i>	
69.4 <i>Fusion</i>	
69.5 <i>Nucleosynthesis, or a very Big Bang and beyond</i>	
69.6 <i>Transuranium elements and the superheavies</i>	
Appendix A: THERMOCHEMICAL TABLES	A-1
Appendix B: AQUEOUS EQUILIBRIUM CONSTANTS	B-1
Appendix C: HALF-CELL POTENTIALS	C-1
Appendix D: ANSWERS TO END-OF-CHAPTER PROBLEMS	D-1
